

FALCON Bull Barrel Pneumatic Air Rifles
 for pure quality of design and performance it is difficult to find their equal.....

These rifles are not just manufactured, they are hand crafted using the finest materials. Not only the best of barrels manufactured by **LOTHAR WALTHER**, but also the finest Italian stocks produced by **MINELLI**. These two companies have a wealth of experience spanning over one hundred years. When you buy a **FALCON** airgun you will experience a new way of shooting and will see that the investment you have made has been more than worthwhile.

Prairie 'B' Carbine single-shot in Walnut Sporter stock

Lighthunter 'B' Carbine multi-shot in Walnut Skeleton stock

FALCON features

Top grade 12 groove Lothar Walther barrels.

The rifle's efficient power plant returns a superb shot to shot consistency.

Single or multi shot versions of these rifles are available. Multi-shots use 8-shot magazines operated by bolt action.

Triggers are of the two stage variety with infinite adjustment between first and second stages and come with integral manual resettable safety catch.

Deluxe high definition wooden stocks in three styles and two finishes. Sporter, Profile and Skeleton in Beech or Walnut. (Skeleton on a Carbine Action only)

Air levels can be seen at a glance via the fitted manometer.

Quick fill adaptor made from anti-corrosive materials with a built in 20-micron filter.

FALCON, fantastic free style rifles

Light hunter	87cm(34.25ins)	35.5cm(14ins)	2.9kg(6.4lbs)	16 joules (12ftlbs)	not available	27 joules(25ftlbs)

FALCON Stock configurations.

Sporter style stocks are available in Beech or Walnut

Profile style stocks are available in Beech or Walnut

Lighthunter style stocks are available in Beech or Walnut

MODEL OPTIONS:

CARBINE/RIFLE - These are fitted with threaded muzzle ends to complete the traditional look of the rifle.

CARBINE - Available in calibre 4.5mm (.177) 16 joules (12 ft. lbs.) only and calibre 5.5mm (.22) 16 joules (12 ft. lbs.) or 34 joules (25 ft.lbs). The Carbine has a large following because its size allows it to be used in very confined spaces. It is light to carry and with its point-ability makes it something very special. This compact rifle with its very efficient power plant returns a high number of consistent shots. In the 4.5mm calibre (.177) it returns 60 shots at 16 joules (12 ft. lbs.) and in the 5.5mm calibre (.22) it returns 75 shots. In the High power model 5.5mm (.22) it returns 30 shots. With this model there are 3 stock options- SPORTER, PROFILE and LIGHTHUNTER. The shooter is just spoilt for choice.

LIGHTHUNTER- has the same power plant as the carbine but has a stock of its own design and can be seen illustrated below.

RIFLE -This is the 'Big Brother' of the Carbine and with its longer cylinder and barrel it returns 80 consistent shots in calibre 4.5mm (.177) with a power of 16 joules (12 ft. lbs.) and 30 shots in High power of 27 joules (20 ft.lbs.). In calibre 5.5mm (.22) your shot count will be 110 at 16 joules (12 ft.lbs.) and 30 at 41 joules (30 ft.lbs.).

ACCESSORIES - Moderators and 8 shot magazines.

We at FALCON Airguns thank you for your interest in our rifles and if you require any further information please either contact your nearest retailer or Falcon Airguns direct.
